

Date: 22nd November, 2009

Affected Products: IFS-888 – 8 zone conventional Fire Indicator Panel

Dear Valued Customer,

NOTIFIER is intending to discontinue production of the IFS-888, 8 zone conventional fire indicator panel. While this has been a very successful product offering over many years, as part of a continual review and improvements to our product range we are forced to announce its discontinuance.

It is expected that production of the IFS-888 will cease early in 2010, at which time customers are encouraged to transition to the IFS-2608 and IFS-2600 fire indicator panels.

It is our intention to manufacture and stock repair boards (RBs) for the discontinued products until the cost of circuit board components are prohibitive or piece part components become obsolete. Please contact your Regional Sales Manager or Technical Support if you have any questions regarding this notice.

If you have any question please do not hesitate to contact me.

Sincerely,

James Edwards
Product Manager
